## DEVSEC OPERATIONS FIELD MANUAL

# **The DevSecOps FieldManual**

*Tom Herfort und Dominik Sigmund*

28 January 2021

## **1. Introduction**

Here is my intro

## **2. 4-types-of-work**

There are 4 types of work in IT:

- 1 Business projects. Projects around delivering direct customer value.
- 2 Internal IT projects. Infrastructure and operations projects, internal improvements.
- 3 Changes. Fixed, changes, improvements generated by the two above.
- 4 Unplanned work. Incidents

We should focus to use our time on business value only. For that we need to have internal IT projects to improve our components.

To minimize the unplanned work we need to have:

- 1 Stable Systems.
- 2 Trained Users.
- 3 Automation
- 4 Best Practises

### **3. npm-audit**

Checks for vulns in packages

`npm audit`

It may also fix some issues

`npm audit --fix`

#### **4. npm-outdated**

Checks outdated packages.
